INSTALLATION AND MAINTENANCE LISKI SLIP BNET

18/09/2026

INTRODUCTION

Liski, thanks to its fifty years experience in the agonistic and touristic ski field, is an Italian Company active on the national and international market, with a full range of products for preparation of race slopes for alpine skiing, snowboard, freestyle, cross-country and biathlon; signs systems and security equipment for every type of ski slope and ski resort. Liski is present in motor sport, soccer, bike and other sports.

Liski main priority is the research for high–performance and safe materials, thanks to lead technologies and collaboration with World Cup circuit teams and ski resort experts.

Starting from the beginning of its activity, the strict synergy between Universities and specialized Experimental Search Laboratories ensured the preparation of safety materials, that are subjected to the laboratory crash tests, along with the extensive testing on the field.

LISKI Slip B NET is an innovation of safety Bnet conforms at the Ski Word Cup classification events. Set up and product maneging on the slope by workforce, is not different rispectly at the knowed, classic Bnet Liski.

Liski is a supplier of most important national ski teams and also for very important ski events worldwide like Olympic Games and World Championships.

Every year many hundreds of kilometers of this system are installed in many ski resorts in the World and these nets save the life of hundreds of people; we continually receive numerous positive feedback from installation crews, race organizer committees, technical delegates, coaches, and everyone involved in making ski racing.

Design, manufacturing and assembly of LISKI Slip BNET system are made in Italy, synonymous of quality and professionalism; these systems are very easy and fast to use and to assemble; technical specifications, and fully documented testing reports can be requested to info@liski.it .

Protezione "Slip Bnet" "Slip Bnet" Protection Net

Protezione utilizzata in tracciati gara di WORLD CUP (in particolare per Sci Alpino, SX, SBX, Sci Alpinismo).
Si contraddistingue per la sua dinamicità e praticità nel posizionamento in pista.
Oltre alla sua funzione di protezione, essendo posizionata in punti strategici di alta visibilità (curve, paraboliche, ecc), può essere personalizzata con loghi di sponsor e ski resort.

Protection used on WORLD CUP race courses (particularly for Alpine Skiing, SX, SBX, and Ski Mountaineering).
It stands out for its dynamic design and practicality when positioned on the slopes.
In addition to its protective function, being placed in strategic, highly visible areas (curves, parabolics, etc.), it can be customized with sponsor and ski resort logos.

Schema montaggio rete "Slip Bnet" (esempio)
Set up model for "Slip Bnet" (example)
